// CORE CAPABILITIES

What LATIA Does For You

AI Code Generation

Generate full projects, components, and features using Claude + OpenAI – deployed instantly to GitHub Pages.

Lead Generation

Autonomous lead scanning tied to your active projects. Score prospects, manage outreach, close deals – all automated.

GitHub Auto-Deploy

Push code to GitHub Pages with one click. Your projects go live without touching a terminal.

Real-Time Agents

Three background agents run 24/7 – monitoring, generating, and optimizing your platform automatically.

Multi-Model AI

Claude + OpenAI working together inside one platform. Use the best model for each task.

Live Dashboard

Full project management dashboard with analytics, agent status, lead tracking, and deployment history.

// AUTONOMOUS AGENTS

Your AI Team Never Sleeps

LEADGEN AGENT

Scans for leads tied to active projects, scores prospects, and manages outreach sequences automatically.

Every 6 hours

PROJECT MONITOR

Checks build status and deployment health across all projects. Alerts on failures instantly.

Every hour

CONTENT AGENT

Generates content updates, copy refreshes, and SEO improvements for all deployed projects.
